

Rebel has built a strong track record
in the development, structuring, and financing
of pipeline projects across the world,
*from water and wastewater to gas, hydrogen,
CO₂, steam, and heat networks.*

REBEL GLOBAL PIPELINE PROJECTS

The Netherlands

- Financial structuring and financing of Heat Network Westland, transporting 500 MW of heat through the Westland region (HVC & Capturam).
- Business case and structuring of a EUR 650 million heat transportation pipeline from the Port of Rotterdam to The Hague and Leiden.
- Business case review of the CO₂ transportation pipeline (OCAP), aimed at transporting CO₂ to greenhouse zones in North Holland
- Business case for the steam transportation pipeline system in Rotterdam's Botlek industrial zone (Stedin).
- Economic advisory for heat supply (via pipeline) to an LNG terminal in Eemshaven.

Global *Overview*

We have contributed to 16 major pipeline initiatives spanning the **Middle East, Africa, Europe, and Asia.**

Tunisia

- Feasibility study for export-oriented green hydrogen trade, including transmission pipeline options to Europe (The World Bank).

Algeria

- Business case analysis for exporting green hydrogen from Algeria to EU markets, including financial analysis of the Algeria–EU transmission pipeline (GiZ).
- Contractual and financial structuring for the Nigeria–Algeria Gas Pipeline (AfDB/Infrastructure Consortium for Africa).

Kenya

- Privately-led development of the Naivasha bulk water supply system for industrial and domestic use, including a 45.5 km transmission network (Vitens Evides International).
- Feasibility assessment for extending the Chebara water transmission pipeline (ELDOWAS).

Saudi Arabia

- Privatization strategies for 29 desalination and power **generation/water transmission assets** for Saudi Arabia's Saline Water Conversion Corporation.
- Financial advisor on a **water and wastewater transaction, including respective transmission networks** for 10 landports.

Germany

- Preliminary feasibility of transporting CO₂ via pipeline network (or alternatives) from Duisburg to Antwerp (Port of Duisburg).

Oman

- Concept study for Oman–UAE Water Interconnections (Al Ain – Buraimi and Mirbah – Madha).

Philippines

- Feasibility assessment of the New Centennial Water Source Project, including raw water transmission pipeline (PPP Center/MWSS).
- Transaction advisory for the Batangas to Metro Manila Natural Gas Pipeline (Bat-Man I), a 110 km natural gas transmission pipeline (PPP Center/MWSS).
